PITCH STEP 01 / 05

THE PROBLEM

Visual help today is costly, local and hard to pay across borders.

- **2.2 billion** people live with a vision impairment (WHO, 2026)
- **$26 a month** buys 20 minutes of paid visual help in the US (Aira)
- **At 3 a.m.** nearby helpers sleep, so help must come from abroad
- **6.49%** to send $200 across borders, often taking days (World Bank)

Who it hurts: visually impaired people who just need a quick look, at any hour, anywhere.

Low vision can turn a medicine label into this.

Try it at /about on the live site.

PITCH STEP 02 / 05

THE SOLUTION

Live help from a verified sighted guide, paid by the second.

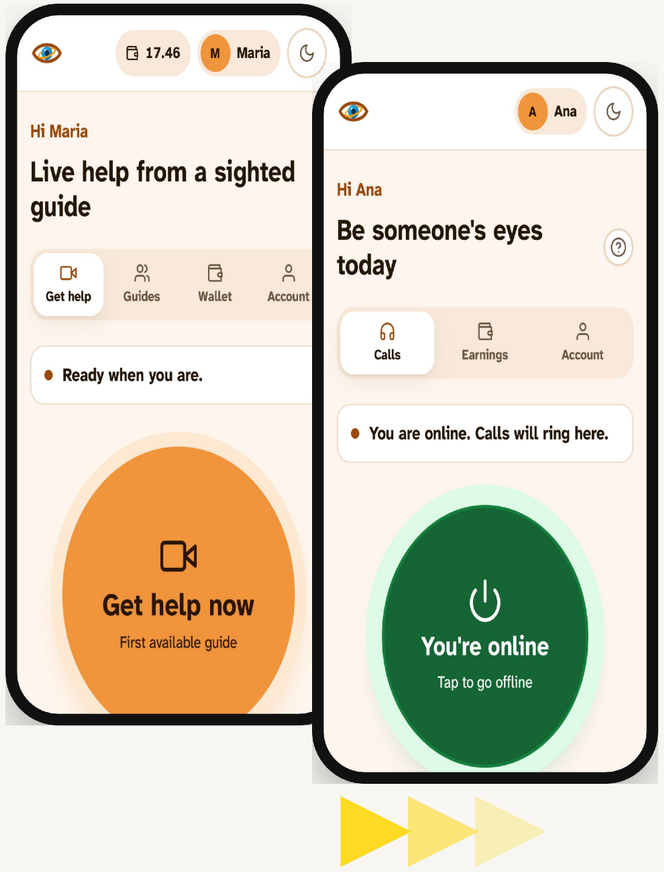

01 **Match**
Tap Get help; a verified guide accepts, live.

02 **Lock**
The budget is locked in USDC on Stellar.

03 **Call**
The guide video calls you on WhatsApp.

04 **Settle**
Exact seconds billed; the rest comes back.

05 **Pay**
The guide is paid the moment it ends.

Soroban CallEscrow · Circle USDC · SEP-24 anchor · live on Stellar testnet

Why it wins: no subscription, help around the clock, money that moves in seconds.

PITCH STEP 03 / 05

MARKET

Two sides: people who need eyes, people who lend them.

- **Who pays:** visually impaired people, a 2.2 billion-person need (WHO)
- **Who earns:** sighted guides anywhere, paid in USDC in seconds
- **How we earn:** a 5% fee on each guide payout, taken on-chain
- **Why now:** stablecoins and Stellar make tiny global payouts practical

Who it's for: visually impaired people who need a quick look, and sighted people anywhere who can earn from minutes of their time.

$1.30 a minute

Paid visual help in the US today, sold as a $26 monthly subscription (Aira).

0.20 USDC a minute

A Stelleye guide's rate in the demo, billed by the second. Guides set their own.

PITCH STEP 04 / 05

ROADMAP

From human guides to a fully automatic service.

01

Now · v1

Human guides on WhatsApp, per-second billing and instant payout on Stellar.

02

Passkeys

Face ID passkey wallets and sponsored fees: no passwords, no XLM.

03

Global rails

USDC top-ups from other chains (CCTP) and mainnet with a licensed anchor.

04

Fully automatic

A 3D understanding and navigation visual harness serves requests and pays per request on Stellar, with no human in the loop.

Vision: eyes on call for everyone, any hour, paid fairly; first with people, then fully automatic.

PITCH STEP 05 / 05

THE TEAM

A solo builder, end to end.

SH

Saman Hazemijebelli

Founder · full-stack and Soroban developer

- Built Stelleye end to end: Soroban contract, Django app, Stellar money rails.
- Accessibility first: screen-reader tested, WCAG contrast, 44 px touch targets.
- github.com/Gastaan/Stelleye · live on Modal
